

RZR Trail / Trail S Aluminum Roof Install Instructions

Hardware

SKU: MA-RZTRL-RF-2-AL

Fits: 2021 – 2022 RZR Trail /Trail S

4 – 1/4" X 3/4" Bolt

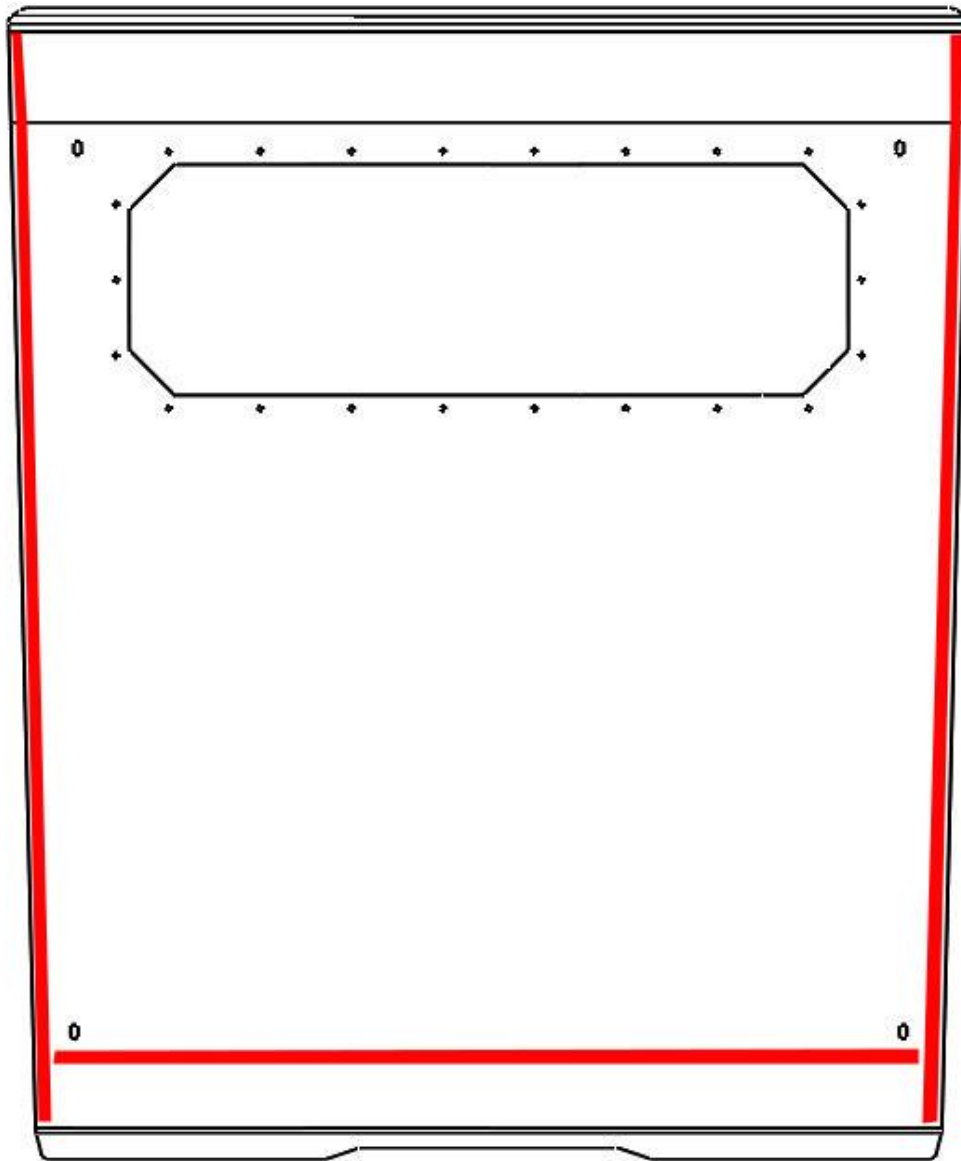

4 – 1/4" Locknuts

8 – 1/4" Flat Washer

11 ft. – 1/2" X 3/8" Edge Foam

STEP 1. Install adhesive foam strips on the bottom of the roof where the redlines are on image. The foam should be close to the side edges, and the rear piece should be where the rear cross bar on the cage is. To find this location, place roof on the cage and mark with masking tape where the rear cage bar is for reference.

The adhesive on the foam is very strong, where ever it is place it will be permanent.

STEP 2. Place the roof on the top of the cage lining up each hole. Start the 3/4" bolts with washers and nuts in each available hole. Begin tightening the bolts starting at the back making sure to keep the roof centered.
